This was a tremendous flush that has very similar phenotype. All sired by "Mr. Hereford" who was the record selling bull in 2011 and is a featured sire for Genex. These sons will be among the first to sell in the country this season and we think they will be very popular with both purebred and commercial cattlemen. They are backed by a tremendous cow "R111" who is becoming one of our most prolific and popular donor cows. Full brothers sell as lots 36,43,48 and 49.

These brothers should offer tremendous versatility when mating because of their low birth weight and high milk and growth numbers. They should also produce superior replacement females because of the maternal heritage stacked up for generations in their pedigree. A full sister to these bulls sold for \$28,000 to Iron Lake Ranch, TX in or fall female sale. Full brothers sell as lots 36,41,48 and 49.

This is a powerful genetic package the blends together "Mr. Hereford" with "Notice Me". This bull is extremely long sided and has that extra look and balance from the side. He is very smooth blending from beginning to end and has added pigment to go with his standout pattern. He is a very sound structured, long strided bull that has extra bone and foot size. This is an impressive individual because of his added performance and length of body. We see him as being a very versatile herd sire that should have extra longevity because of his structural soundness.

We feel this is one of the elite herd sires that we will offer for sale this year. He combines so much quality and balance with a tremendous amount of muscle shape and body depth. He has continued to impress us with his gain and performance since weaning and has become one of our top young prospects. His mother is a full sister to "New Era" and was the high selling female in our 2009 fall sale. This is her first flush of calves and we are excited about her production. Three full sisters sold in our 2012 female sale and averaged \$10,000. His extra pigment and color pattern is an added bonus to his standout phenotype. Full brothers sell as lots 86,89 and 90. Owned with Bar One Ranch.

This is one of the very top herd sire prospects in the sale because of his outcross genetics to our program and his superior genetic profile. We had high hopes that this mating of the ABS sire "Sentinel" and "R111" would produce a herd bull that we could use heavily and Lot 88 is what we were hoping for. He has so many of the quality's we as purebred Hereford breeders are in search of. Proven low birthweight genetics blended with high growth and maternal traits. What makes this bull unique is he has all of this but still has the muscle and carcass traits that are being demanded by today's beef industry. He has the ability to be bred to heifers and should produce offspring that will excel in both carcass merit and maternal traits. Two full sisters averaged \$13,500 in our fall female sale going to top purebred breeders GKB in TX and Perks Ranch in IL.

This is a big time herd bull prospect and could potentially become the favorite in the end. You will love this bulls balance and pattern and the way he blends so many good qualities into one package. If you are a purebred breeder in search of a bull to sire show heifer prospects that have extra look this bull should meet those needs. We feel he could be a top show prospect in the next couple years as well because of his added style and structural correctness. His mother is a full sister to "New Era" and was the high selling female in our 2009 fall sale. This is her first flush of calves and we are excited about her production so far to say the least. Three full sisters sold in our 2012 female sale and averaged \$10,000. Full brothers sell as lots 83,86, and 90. Owned with Bar One Ranch.
